REFER TO: Joint Interoperability Test Command (JTE)

**30 Nov 12**

### MEMORANDUM FOR DISTRIBUTION

**SUBJECT:** Extension of the Special Interoperability Test Certification of the Cisco Catalyst 4500E Series with Supervisor Engine 7L-E (Sup7L-E) Switch Release Update from IOS XE 3.3(0)SG to 3.3(1)SG

- References:
- (a) Department of Defense (DoD) Directive 4630.05, "Interoperability and Supportability of Information Technology (IT) and National Security Systems (NSS)," 5 May 2004
  - (b) Chairman, Joint Chiefs of Staff Instruction (CJCSI) 6212.01E, "Interoperability and Supportability of Information Technology and National Security Systems," 15 December 2008
  - (c) through (e), see Enclosure 1

1. References (a) and (b) establish the Defense Information Systems Agency (DISA), Joint Interoperability Test Command (JITC), as the responsible organization for interoperability (IO) test certification.
2. The Cisco WS-C4507R+E with Sup7L-E Switch Release IOS XE 3.3(0)SG is hereinafter referred to as the System Under Test (SUT). The SUT meets all of its critical IO requirements and is certified for joint use within the Defense Information System Network (DISN) as an Assured Services Local Area Network (ASLAN) Layer 2 Access switch. The SUT is certified as interoperable for joint use with other ASLAN components listed on the Unified Capabilities (UC) Approved Products List (APL) with the following interfaces: 10/100/1000BaseT and 100/1000BaseX for access, 1000BaseT and 1000/10000BaseX for uplink. All of these interfaces were tested with the exception of the 10BaseT interface. JITC analysis determined that the 10BaseT interface is a low risk for certification based on the vendor's Letter of Compliance (LoC) to comply with the Institute of Electrical and Electronics Engineers (IEEE) 802.3i standard and the testing data collected at all other data rates. The SUT meets the critical IO requirements set forth in Reference (c), using test procedures derived from Reference (d). The Cisco WS-C4503-E, WS-C4506-E, and WS-C4507R-E switches with Sup7L-E employ the same software and similar hardware as the SUT. JITC analysis determined these systems to be functionally identical to the SUT for IO certification purposes, and they are also certified for joint use.

The SUT is certified to support Assured Services within an ASLAN. If a component meets the minimum requirements for deployment in an ASLAN, it also meets the lesser requirements for deployment in a non-ASLAN. Non-ASLANs are "commercial grade" and provide support to Command and Control (C2) (ROUTINE only calls) (C2(R)) or non-C2 voice subscribers. When deployed in a non-ASLAN, the SUT may also be used to receive all levels of precedence, but is

JITC Memo, JTE, Extension of the Special Interoperability Test Certification of the Cisco Catalyst 4500E Series with Supervisor Engine 7L-E (Sup7L-E) Switch Release Update from IOS XE 3.3(0)SG to 3.3(1)SG

limited to supporting calls that are originated at ROUTINE precedence only. Non-ASLANs do not meet the availability or redundancy requirements for C2 or Special C2 users and therefore are not authorized to support precedence calls originated above ROUTINE.

Testing of the SUT did not include video services or data applications; however, simulated video traffic, preferred data, and best effort data were generated during testing to determine the SUT's ability to prioritize and properly queue voice media and signaling traffic. No other configurations, features, or functions, except those cited within this document, are certified by JITC. This certification expires upon changes that affect IO but no later than three years from the date of the UC APL memorandum, 12 September 2012.

3. The extension of this certification is based upon Desktop Review (DTR) 1. The original certification is based on IO testing conducted by the United States Army Information Systems Engineering Command, Technology Integration Center (USAISEC TIC), review of the vendor's LoC, DISA adjudication of open test discrepancy reports (TDRs), and the DISA Certifying Authority (CA) Recommendation. The IO testing was conducted by the USAISEC TIC, Fort Huachuca, Arizona, from 7 May through 15 June 2012. Review of the vendor's LoC was completed on 17 July 2012. DISA's adjudication of outstanding TDRs was completed on 7 August 2012. The DISA CA provided a positive recommendation on 25 August 2012, based on the security testing completed by USAISEC TIC-led Information Assurance (IA) test teams. Those test results are published in a separate report, Reference (e). This DTR was requested to update Cisco IOS Release 3.3.(0)SG to 3.3.(1)SG. JITC determined there was minor risk in approving DTR1 without interoperability testing because the IOS update includes maintenance upgrades that do not include any hardware or software feature upgrades, therefore, do not change the interoperability results. DTR 1 has no impact on the approved IA posture, so the original CA approval date still applies. Therefore, JITC approves this DTR.

4. Table 1 provides a UC APL product summary. Table 2 provides the SUT interface IO status and Table 3 provides the Capability Requirements (CRs) and Functional Requirements (FRs) status. The threshold CRs/FRs for ASLAN components are established by Section 5.3.a of Reference (c) and were used to evaluate the IO of the SUT. Enclosure 3 provides a detailed list of the interface, capability, and functional requirements.

**Table 1. UC APL Product Summary**

Component <sup>1</sup>	Release	Sub-Component <sup>1</sup>	Certification Applicability		
			Core	Distribution	Access
<u>WS-C4507R+E</u> WS-C4503-E WS-C4506-E WS-C4507R-E	IOS XE 3.3.(1)SG	<u>WS-X45-Sup7L-E, WS-X4712-SFP+E, WS-X4748-RJ45V+E, WS-X4640-CSFP-E, WS-X4606-X2-E, WS-X4648-RJ45V+E, WS-X4548-RJ45V+, WS-X4748-RJ45-E, WS-X4748-UPOE+E, WS-X4648-RJ45-E, WS-X4548-GB-RJ45V, WS-X4548-GB-RJ45</u> WS-X4624-SFP-E <sup>2</sup> , WS-X4612-SFP-E <sup>2</sup> , WS-X4248-FE-SFP <sup>2</sup> , WS-X4148-FX-MT <sup>2</sup> , WS-X4448-GB-SFP <sup>2</sup>	N/A	N/A	Yes

JITC Memo, JTE, Extension of the Special Interoperability Test Certification of the Cisco Catalyst 4500E Series with Supervisor Engine 7L-E (Sup7L-E) Switch Release Update from IOS XE 3.3.(0)SG to 3.3.(1)SG

**Table 1. UC APL Product Summary (continued)**

<b>NOTE:</b>			
1. Components bolded and underlined were tested by the USAISEC TIC. The other components in the family series were not tested; however, they utilize the same OS software and similar hardware. JITC analysis determined them to be functionally identical for IO certification purposes and they are also certified for joint use.			
2. These modules are certified based upon test data collected during previous ASLAN certification test events; no changes to modules or hardware and no changes to the requirements since modules were last tested and certified.			
<b>LEGEND:</b>			
APL	Approved Products List	N/A	Not Applicable
ASLAN	Assured Services Local Area Network	OS	Operating System
IO	Interoperability	TIC	Technology Integration Center
IOS	Internetworking Operating System	UC	Unified Capabilities
JITC	Joint Interoperability Test Command	UCR	Unified Capabilities Requirements
L2	Layer 2	USAISEC	U.S. Army Information Systems Engineering Command

**Table 2. SUT Interface Interoperability Status**

Interface	Applicability			UCR 2008, Change 3 Reference	Threshold CR/FR <sup>1</sup>	Status	Remarks
	Co	D	A				
Serial	C	C	C	5.3.1.3.9	1-4	Certified	The SUT met the CRs and FRs with the following standard: EIA-232.
10Base-X	C	C	C <sup>2</sup>	5.3.1.3.1	1-6	Certified <sup>3</sup>	The SUT met CRs and FRs with the following IEEE standard: 802.3i (10BaseT).
100Base-X	R	R	C <sup>2</sup>	5.3.1.3.1	1-6	Certified	The SUT met CRs and FRs with the following IEEE standard: 802.3u (100BaseT/F).
1000Base-X	R	R	C <sup>2</sup>	5.3.1.3.1	1-6	Certified	The SUT met CR and FRs with the following IEEE standards: 802.3ab (1000BaseT), 802.3z (1000Base-SX, 1000Base-LX).
10000Base-X	C	C	C	5.3.1.3.1	1-6	Certified	The SUT met CRs and FRs with the following IEEE standard: 802.3ae (10GBase-SR, 10GBase-LR).
802.11a	C	C	C	5.3.1.3.1/5.3.1.7.2	1-6	Not Supported <sup>4</sup>	N/A
802.11b	C	C	C	5.3.1.3.1/5.3.1.7.2	1-6	Not Supported <sup>4</sup>	N/A
802.11g	C	C	C	5.3.1.3.1/5.3.1.7.2	1-6	Not Supported <sup>4</sup>	N/A
802.11n	C	C	C	5.3.1.3.1/5.3.1.7.2	1-6	Not Supported <sup>4</sup>	N/A
802.16	C	C	C	5.3.1.3.1/5.3.1.7.2	1-6	Not Supported <sup>4</sup>	N/A

**NOTES:**

1. The SUT high-level CR and FR ID numbers depicted in the Threshold CRs/FRs column can be cross-referenced in Table 3. These high-level CR/FR requirements refer to a detailed list of requirements provided in Enclosure 3.
2. Core and Distribution products must minimally support 100Base-X (802.3u) and 1000Base-X (802.3z). Access products must minimally support one of the following standards: 802.3i (10BaseT), 802.3j (10BaseF), 802.3u (100BaseT/F), 802.3z (1000BaseF), or 802.3ab (1000BaseT). Other rates and standards may be provided as conditional interfaces.
3. The USAISEC TIC tested all these interfaces with the exception of the 10BaseT interface. JITC analysis determined that the 10BaseT interface is a low risk for certification based on the vendor's LoC to the IEEE 802.3i and the testing data collected at all other data rates.
4. The SUT does not support this interface. This interface is not required for a Core, Distribution, or Access switch.

JITC Memo, JTE, Extension of the Special Interoperability Test Certification of the Cisco Catalyst 4500E Series with Supervisor Engine 7L-E (Sup7L-E) Switch Release Update from IOS XE 3.3(0)SG to 3.3(1)SG

JITC Memo, JTE, Extension of the Special Interoperability Test Certification of the Cisco Catalyst 4500E Series with Supervisor Engine 7L-E (Sup7L-E) Switch Release Update from IOS XE 3.3(0)SG to 3.3(1)SG

**Table 3. SUT CRs and FRs Status (continued)**

<b>NOTES:</b>			
1. The annotation of 'Required' refers to a high-level requirement category. The applicability of each sub-requirement is provided in Enclosure 3. The SUT does not need to provide conditional requirements. However, if a capability is provided, it must function according to the specified requirements.			
2. This requirement was verified and met using simulated voice, video, and data traffic in an operational emulated environment to meet E2E requirements. The SUT must be deployed IAW deployment guide and engineering guidelines in UCR 2008, Change 3, Section 5.3.1.4.			
3. This requirement was met with the following stipulations: It is the site's responsibility to configure the SUT in a manner which meets the engineering requirements listed in Section 11.2 d. of Enclosure 2, and that it does not create a single point of failure which could impact more than 96 C2 users.			
4. Wireless and MPLS were not tested and are not certified for joint use. Wireless and MPLS are conditional and; therefore, not required for a Core, Distribution, or Access switch.			
<b>LEGEND:</b>			
C2	Command and Control	MPLS	Multiprotocol Label Switching
CR	Capability Requirement	NM	Network Management
E2E	End-to-End	QoS	Quality of Service
FR	Functional Requirement	SUT	System Under Test
ID	Identification	UCR	Unified Capabilities Requirements
IAW	In Accordance With	VLAN	Virtual Local Area Network
IPv6	Internet Protocol Version 6	VPN	Virtual Private Network

5. In accordance with the Program Manager's request, no detailed test report was developed. JITC distributes IO information via the JITC Electronic Report Distribution (ERD) system, which uses Unclassified-But-Sensitive Internet Protocol Router Network (NIPRNet) e-mail. More comprehensive IO status information is available via the JITC System Tracking Program (STP), which is accessible by .mil/.gov users on the NIPRNet at <https://stp.fhu.disa.mil>. Test reports, lessons learned, and related testing documents and references are on the JITC Joint Interoperability Tool (JIT) at <http://jit.fhu.disa.mil> (NIPRNet). Information related to DISN testing is on the Telecom Switched Services Interoperability (TSSI) website at <http://jitc.fhu.disa.mil/tssi>. All associated data is available on the DISA Unified Capability Coordination Office (UCCO) website located at <http://www.disa.mil/ucco/>. Due to the sensitivity of the information, the Information Assurance Accreditation Package (IAAP) that contains the approved configuration and deployment guide must be requested directly from U.S. Government civilian or uniformed military personnel at the UCCO; e-mail: [disa.meade.ns.list.unified-capabilities-certificaion-office@mail.mil](mailto:disa.meade.ns.list.unified-capabilities-certificaion-office@mail.mil).

JITC Memo, JTE, Extension of the Special Interoperability Test Certification of the Cisco Catalyst 4500E Series with Supervisor Engine 7L-E (Sup7L-E) Switch Release Update from IOS XE 3.3.(0)SG to 3.3.(1)SG

6. The testing point of contact Mr. James Hatch, DSN 821-2860, commercial (520) 533-2860, or email to [james.d.hatch12.civ@mail.mil](mailto:james.d.hatch12.civ@mail.mil). The JITC point of contact is Ms. Anita Mananquil, DSN 879-5164, commercial (520) 538-5165, FAX DSN 879-4347, commercial (520) 538-4347, or e-mail to [anita.l.mananquil.civ@mail.mil](mailto:anita.l.mananquil.civ@mail.mil). JITC's mailing address is P.O. Box 12798, Fort Huachuca, AZ 85670-2798. The Tracking Number for the SUT is 1126909.
